

Summary:

WHAT WE DO

Asset Based Lending (ABL) lends to residential real estate investors to finance the purchase and rehabilitation of single and multi-family properties and residential new construction. Our clients are investors or owners who are unable to obtain bank financing for a variety of reasons. Our most important competitive advantage is our ability to respond very quickly to a loan request. We structure conservatively underwritten high yield loans to borrowers who have the capacity and willingness to pay us back in a timely fashion. We receive ample collateral protection via publicly recorded 1st liens on residential and mixed use properties and invest, selectively, as principal. We source loans through referral, local brokers and web based marketing.

WHY INVEST

- Substantial Return** (Projected) *10%-12% annual net return / 6% preferred return; payable monthly*
- Negligible Interest Rate Risk** *11 month average asset payoff*
- Experienced Management** *3 Principals, each having over 30+ years financial markets experience*
- Management Invested** *Principals have over \$15.7mm invested in the Fund*
- Asset Security** *1st liens on residential and mixed-use real estate
Average 56.4% Loan to Value (ARV)*
- Diversification** *Residential loans uncorrelated to larger more liquid capital markets*
- Track Record** *1,406 loans and investments in excess of \$304M since inception*

INVESTMENT STRATEGY

Originate one year loans secured by 1st liens on non-owner occupied residential and mixed use properties. **Originate and invest in residential real estate directly** with the intention to rehabilitate and sell within six to twelve months (~5% of portfolio). **Conservatively leverage the Fund**. **Reduce asset and credit risk** through rigorous underwriting and diversification.
